Process To Connect With Booking.com

A new customer

For new customer we must have to register first on Booking.com, In order to connect or register with over the Booking.com, property require to fill the form over the Booking.com Website.

Kindly find the steps here to fill the registration form : [How to register property with Booking.com](#)

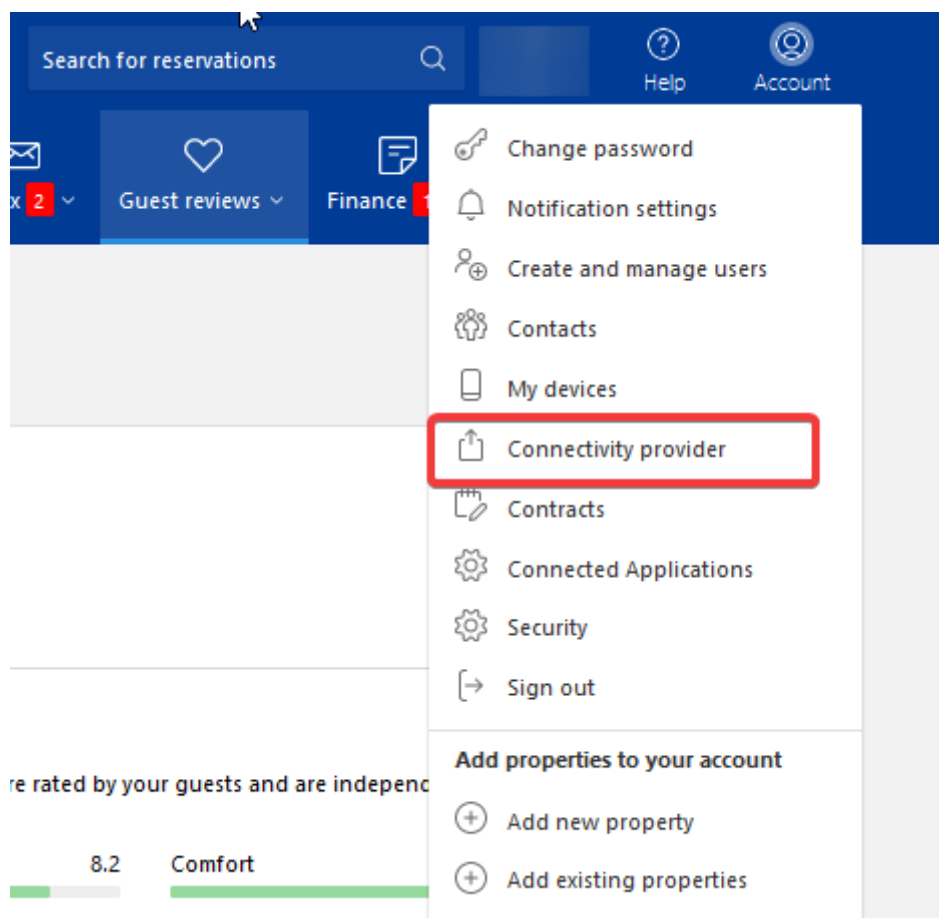

After filling in your information, it will be verified by the Booking.com review system. During verification, your listing will not be live.

An existing customer on channel

Log in to booking.com extranet, select 'OTASWITCH' as your connectivity provider, and take note of the Hotel ID that Booking.com has assigned to your property.

1. Login to Booking.com Extranet
2. Go to **Account** >> Click on **Connectivity provider**
3. Click **Search**.
4. Enter channel management system name (**OTASWITCH**).
5. Tick the option "I have read, accepted and agreed to the Terms and Conditions of the XML service schedule" and click the "Connect" button.
6. After that, you will see the message "Status of the connection request: Waiting for the provider confirmation"

7. Once we approve the connection, you are ready to connect the Booking.com with Channel manager.

Connectivity provider

Want to manage your rates, availability and reservations on Booking.com and other travel websites, all in one platform? Then you probably need a connectivity provider (a channel manager or a PMS for instance).

As your account on Booking.com isn't currently connected to any provider, you can search here to either connect your account to your existing provider, or look through our provider recommendations to connect to a new provider:

[Search](#)

Search for a provider

Enter the name of your connectivity provider in the following box, or choose a recommended provider from the list below. If your provider isn't listed here, please contact them for assistance.

Available connection types

Travelline offers the following connection types, which can be grouped or mandatory depending on the provider. By selecting a connection type, you allow this provider to perform the corresponding actions on your behalf.

☒ Rates and availability Manage the rates and availability for your property

☒ Reservations Manage your existing and future reservations

☒ Guest Reviews Retrieve and respond to guest reviews

☒ Reporting Report and make changes to existing reservations

☒ I have read, accepted and agreed to the [Terms & Conditions](#) of the XML service schedule

[Connect](#)

Status of the connection request: Waiting for provider confirmation

We're currently waiting for OTASwitch confirmation to activate the connection with you. OTASwitch should map all rooms and rates before the connection gets activated.

[Reset connection request](#)

Summary of your pending request:

- OTASwitch is the connectivity provider handling your connection
- The requested type of connection: Reservations, Rates and availability, Guest Reviews, Reporting
- This connection request was submitted on 2022-02-17 at 08:41:03

Next steps:

- OTASwitch will map all your rooms and rates in their system
- Once Travelline confirms that the mapping is complete, your connection will be activated.

Note: your calendar should be automatically imported when your connection is activated.

 Please make sure your property is bookable again on Booking.com as soon as possible. If your rates, availability or restrictions aren't imported to your new connectivity provider calendar after the connection is activated, please contact OTASwitch for assistance.

Credentials

Booking.com provides the Booking.com Property ID, required for mapping

Channel Connection Setup

In "Channel Mapping" Module > Select Booking.com

Setup Credential

The screenshot shows a 'Channel Password' setup form. On the left, there are input fields for 'Channel Hotel ID*', 'Connection Name', 'Default Multiplier*' (set to 1), 'Default Surcharge*' (set to 0), 'Rate Pricing' (set to 'Room Based'), and 'Currency*' (set to 'GBP United Kingdom Pounds'). There is also a checkbox for 'Use STAAH CM' which is unchecked. On the right, there is a list of instructions for each field: 'Channel Hotel ID: Booking.com Property ID / Hotel ID.', 'Connection Name: Use to give a name to your connection to make it easier for searching the connected channel account.', 'Default Multiplier: Use to set the rate multiplication factor applicable for all room types.', 'Default Surcharge: Use to have surcharge applied on all the room types.', 'Rate Pricing: Select rate pricing model as setup on Booking.com.', 'Currency: Property currency Should be the same as set up in Booking.com.', and 'Use STAAH CM: Please enable if property is using STAAH connection as provider.' At the bottom right, there are 'Cancel' and 'Next' buttons.

Once details has been updated, click on **Save** button so it will redirect to mapping screen

Next > Mapping

Upon mapping screen, you can see the list of Booking.com Room Type/Rate Plan along with channel manager Room Type/Rate Plan.

Listing-Rate 1	Listing Name 2	Rate Name 3	Actions 4
(manageable) One Bedroom Apartment-Standard rate 22392 - Default	Listing Standard Room (STD)	Rate EP (EP)	MAP
(manageable) Two Bedroom Z&L and Z&L-Standard rate 22393 - Default	Listing	Rate	MAP
(manageable) Two bed - double and triple-Standard rate 22578 - Default	Listing	Rate	MAP
(manageable) Two beds - Double and Z&L-Standard rate 22579 - Default	Listing	Rate	MAP
(manageable) One bedroom linked-Standard rate 22580 - Default	Listing	Rate	MAP
(manageable) One Bedroom Apartment - 3 Single Beds-Standard rate 23108 - Default	Listing	Rate	MAP

1. **OTA Room Type and Rate Plan Details** - Select Room Type and Rate Plan to map
2. **PMS Room Type** - Select room type(s) to be map. (This room type is set up in channel manager)
3. **PMS Rate Plan** - Select rate plan(s) to map (This rate plan is set up in channel manager)
4. **MAP** - Click on MAP and It will ask to set up Mapping configuration for specific rate plan.

Booking.com - Apartment-BAR Suite Room - EP

☐ Single Occupancy
 Applicable No Of Guest*
 1

☐ Disable Availability
 Fixed Min Stay
 No Yes

☒ Disable Rates
 Min Stay
 2

Single Occupancy: For single use rate, select the checkbox. When selected, an option will appear to allow you to set up multiple rates.

Applicable No of Guest: Select applicable number of guests. Rate will be based on what is received from the PMS for the applicable number of guests.

Disable Functions: If required, you can disable availability and/or rate updates. Generally used for non-manageable mapping.
Disable Availability: Upon Disable Availability, no inventory and/or rates will be managed via channel manager and no updates will be pushed to OTA.
Disable Rates: Upon Disable Rates, only inventory will be managed via channel manager and only inventory will be pushed to OTA.

Fixed Min Stay: Use to set the fixed minimum stay rule for the particular rate plan. This will override the Minimum stay value pushed through the ARR request.

5. **Save** - Click on Save to complete the Rate Plan mapping.

Adding New Room And / Or Rate Plan On The Channel?

Ensure you map the new room or rate plan in the channel manager. This will ensure you can manage inventory and rates plus bookings will be delivered seamlessly to your property management system.

Add/Map A New Room Type

1. Existing Booking.com listing

2. New Booking.com listing

- You can proceed directly from the channel set up page
- If room is already mapped to a Booking.com, you can see the mapping details.
- If room is not linked to a Booking.com, mapping details will not be displayed.

STANDARD ROOM (STD)	MAP
EP (EP) OTA Rateplan: One Bedroom Apartment-Standard rate Pricing Model: Occupancy Based	UNMAP
4BED PREMIUM MUDHOUSE 1 FLOOR (2)	MAP
4BED PREMIUM MUDHOUSE 1 FLOOR (3)	MAP

- Click on 'Map' to map new room type
- You will see below options

4BED PREMIUM MUDHOUSE 1 FLOOR (2)

PROPERTY/LOCATION

[LINK TO NEW LOCATION](#)

☐ 123456

- **Existing ID:** To map the room to an existing Booking.com property ID (Already set up in channel manager), Select the Booking.com property ID (It is possible to have multiple)
- **New Listing ID:** If you want to connect multiple Booking.com channels ID under on property > Click on 'Link To New Location ID' > proceed as per normal OR under channel connection module >> click on Booking.com >> Click on **Add Channel Password** >> Add new new Booking.com ID details and proceed for the mapping.

Important > Remember To Activate Connection

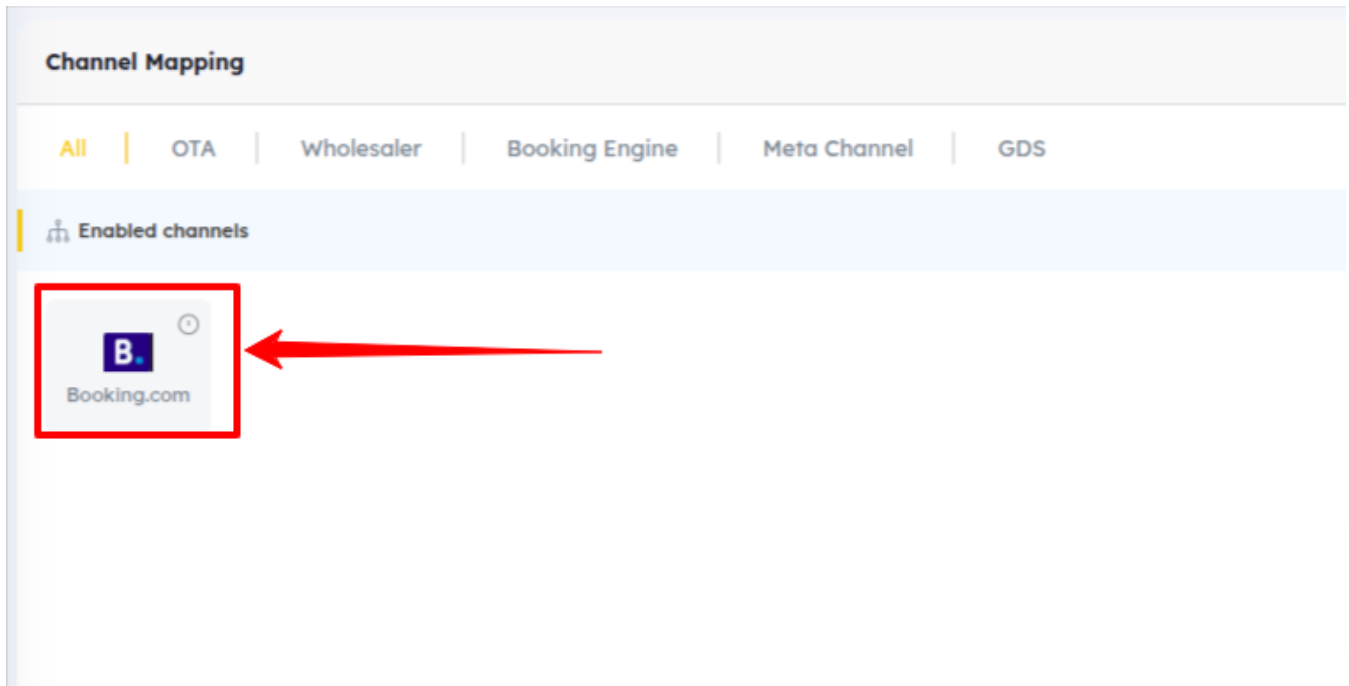

Once the mapping is completed, you need to activate connection. Return to channel connection details module > change status of channel to **ACTIVE** and save. This action will automatically trigger a full update to channel. Please refer to the screenshot below.

The first screenshot shows the 'Channel Mapping' interface. At the top, a breadcrumb trail includes 'Channel Mapping' and 'booking.com', with 'booking.com' highlighted by a red box and a red arrow pointing to it. Below this is a table titled 'Rate Plan Mapping' with columns: 'booking.com Listing-Rate', 'StayInn Test Listing Name', 'StayInn Test Rate Name', and 'Actions'. The table contains one row for '(manageable) Apartment-BAR' with listing ID '1315486301 - 49999167', listing name 'Suite Room', and rate ID 'EP'. The 'Actions' column has 'Edit' and 'Unmap' buttons.

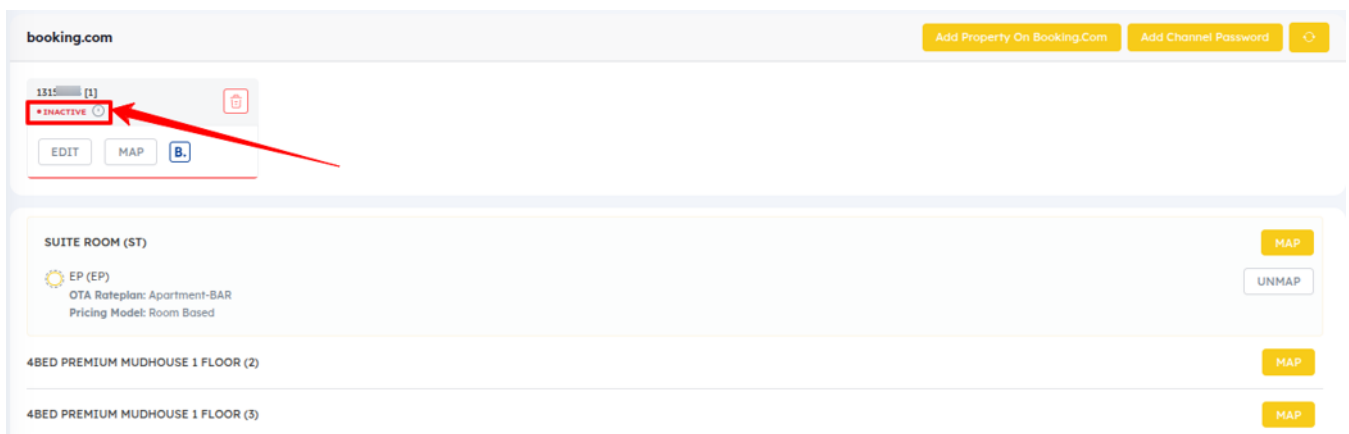

The second screenshot shows the 'booking.com' channel details page. At the top right are buttons for 'Add Property On Booking.Com', 'Add Channel Password', and a refresh icon. Below this is a card for the channel '1315' with a status of 'INACTIVE' (highlighted by a red box and a red arrow) and a toggle switch. Below the status are 'EDIT', 'MAP', and 'B.' buttons. The main content area lists three rate plans: 'SUITE ROOM (ST)' with rate 'EP (EP)', '4BED PREMIUM MUDHOUSE 1 FLOOR (2)', and '4BED PREMIUM MUDHOUSE 1 FLOOR (3)'. Each rate plan has a 'MAP' button and an 'UNMAP' button.

Click on INACTIVE to **Active** the channel

Alternatively, go to 'Channel Mapping' > click on Booking.com

Click on 'Inactive' > Change status to **Active** > Save

Supported Features
