Booking.com - Content API

To streamline the management of property content on Booking.com, we have introduced the Booking.com Content API. This simplifies the process of updating content on Booking.com via the channel manager and makes it easier for PMS partners to manage and update content in one central location within the channel manager.

Content API allows you to create and modify properties on Booking.com. Connect your Channel manager to Content API to enable your users to register their property and modify their content directly in your interface, without using the Booking.com extranet. This includes managing their facilities, rates, and rooms.

Features

Use Content API to:

- Manage room type content.
- Manage property content.
- open and close properties.

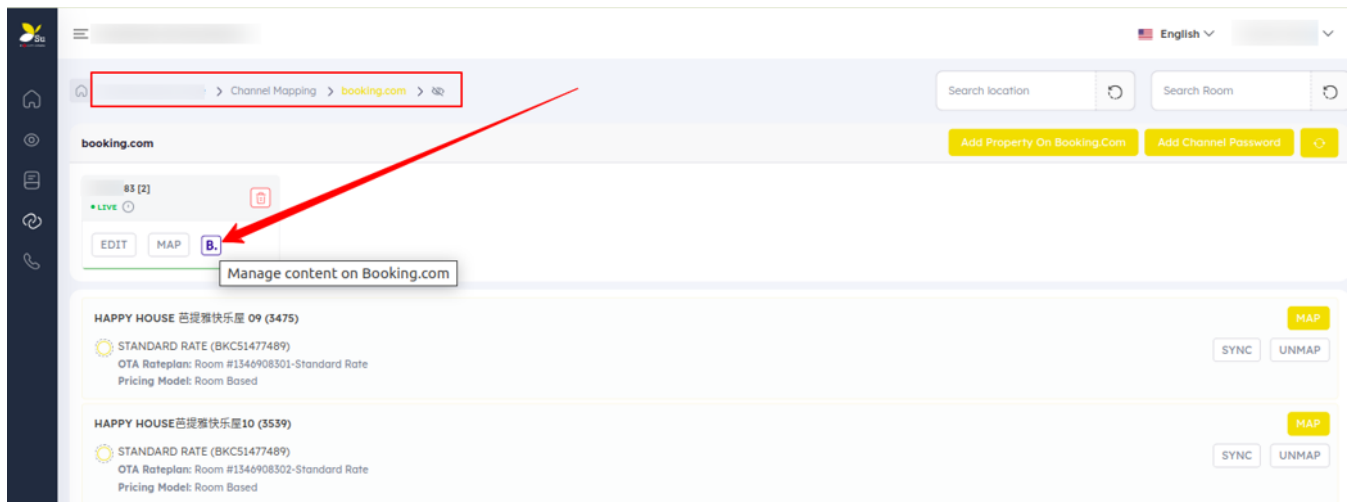

Prerequisite for managing content:

First, the property must be created and active on Booking.com.

The process to manage the content for a property on Booking.com

To manage the content for a property on the booking.com from the Channel Manager. Kindly refer to the steps below.

Go to Channel Mapping > Select Booking.com > Click on Booking.com Icon

Post clicking on the Icon now we can manage the content for the respective booking.com property ID from the Channel manager.

1. Contract:

The contract must be approved, which is an agreement between the hotelier and Booking.com.

Next: Go to Profile page

2. Profile:

The profile section contains the Various fields which are related to the property level.

1. Property Details:

If Proeprty / PMS Partner is required to update the details then they can do it from there where we can update the fields below.

A. Profile Detail: Property Name, Property Category and Target.

1. **Proeprty Name:** The name of the property
2. **Property Category:** Kindly select the category of the property which needs to be updated
3. **Target:** It is either Test or Production. If it is Live Property, Kindly select Production.

B. Localization: Kidly please set the Address of the property in order to update the address.

C. General Info: Specifies the language in which the property wants their Booking.com extranet content and communication (emails, notifications, ...) etc.

Note - The default language will be English.

3. Images:

Upload one or more photos for the property, and add or update photos tags to describe the content of those photos. Whenever a new photo is uploaded, by default, the API places the photo in the property-level photo gallery.

We can also remove the selected images.

Save & Next: Go to the Property Setting Page

4. Property Setting:

In the property settings page, you can update various property settings, such as the pricing type (either OBP - Occupancy Based Pricing or SP - Standard Pricing). Additionally, you can adjust the booking settings, including whether credit card details are required, if the credit card details should be shown, and whether the booker's address and phone number are required.

The screenshot displays the Booking.com property management interface. The 'Property Settings' tab is highlighted with a red box in the sidebar. The main content area shows various settings for the property, including Pricing Type, Booking Model, and various policy options like Require CVC, Allow Smoking, and Long Stay. A 'Missing Information!' warning box is present at the bottom left of the settings area.

In the Property Setting section, we can set about the property as below.

- Property settings
- Booking Setting
- Damage Policies
- Children and pet-related information, configuration, restrictions and policies
- Auto replenish
- Payment Types
- Quiet hours, Renovation, Bed linen policy
- Cancellation Exceptions
- Age Buckets
- Invoice Settings

Save & Next: Go to the Property Facility Page

5. Property Facility:

To manage the amenities and all property facility information, these can be updated through the Content API on the Property Facility page. Based on the enabled amenities, you can schedule details, set charges, and provide relevant information.

3. Cancellation Policy

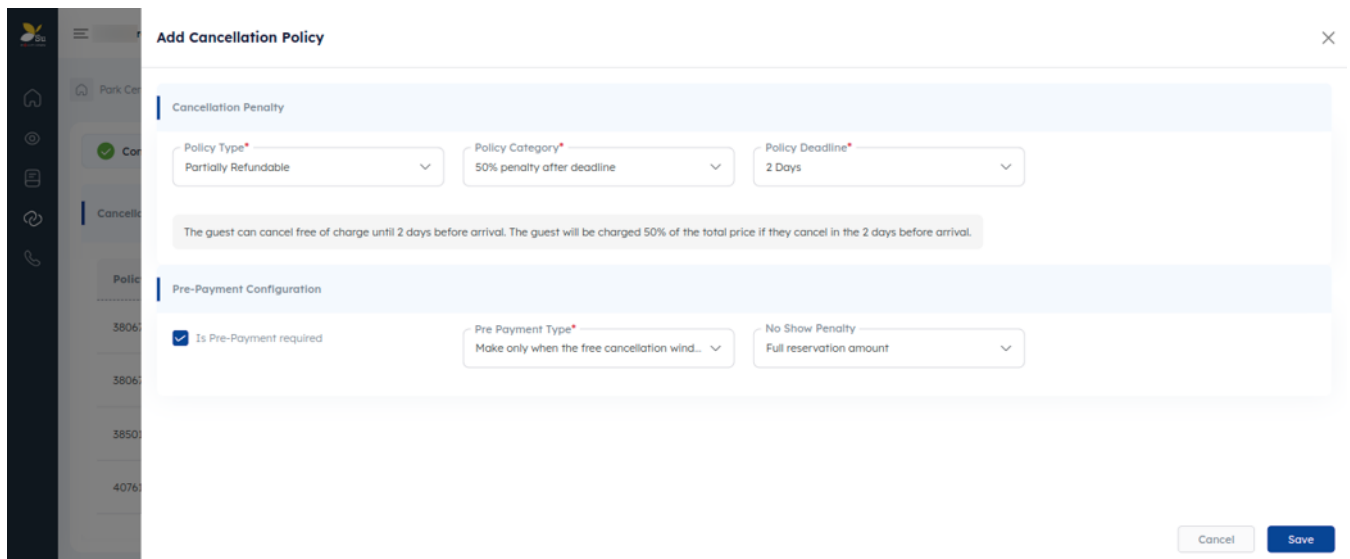

In the cancellation policy section, we can include up to 7 different cancellation policies. Based on the property's specific cancellation policies, we can configure them in this section, which will then be reflected on the Booking.com portal.

The screenshot shows the Booking.com management interface. At the top, there are tabs for 'Contract', 'Profile', 'Cancellation Policy', 'Rooms', and 'Charges'. The 'Cancellation Policy' tab is highlighted with a red box. Below the tabs, there is a table listing existing cancellation policies. A blue arrow points to the '+ Add Cancellation Policy' button in the top right corner.

Policy Id	Policy Type	Policy Category	Policy Deadline	Pre Payment Type	No Show Policy	Actions
380673105	Partially Refundable	Non Refundable After Deadl...	1 Day	Make only when the free can...	Full reservation amount	Edit

Room List Add Room

Channel Room Id	Listing Type	Listing Name	Actions
1080991002	Twin	Superior Twin Room	Edit Delete
1080991003	Twin	Twin Room	Edit Delete
1080991004	Triple	Standard Triple Room	Edit Delete
1080991005	Twin	Economy Twin Room	Edit Delete
1080991006	Twin	I nnnn Twin Room	Edit Delete

The "Rooms" section includes 5 fields, all of which must be filled out to successfully create a room.

The screenshot shows the 'Rooms' tab in the Booking.com management interface. The left sidebar contains a list of options: Room List, Room Details (Twin), Images, Room Facility, Bathroom Facilities, and Room-Rate. The 'Room Details (Twin)' option is highlighted with a red box. The main form displays the 'Room Detail' section for a 'Superior Twin Room'. The 'Listing Type' is 'Twin', 'Listing Name' is 'Superior Twin Room', and 'Reference Name' is '【禁煙】 スーベリアツインルーム'. The 'Number Of Listing' is 5, 'Size' is 19.65, and 'Unit' is 'Square Meter'. The 'Smoking Policy' is 'Non-smoking'. The 'Room Configuration' section shows 'Guest room (Bed Configuration : 1)' and a 'Default Configuration' checkbox.

1. Room Details:

Please ensure to complete all the required details for the room, including:

- Listing/Room Type
- Listing/Room Name
- Room Configuration
- Occupancy
- Extra Bed Configuration

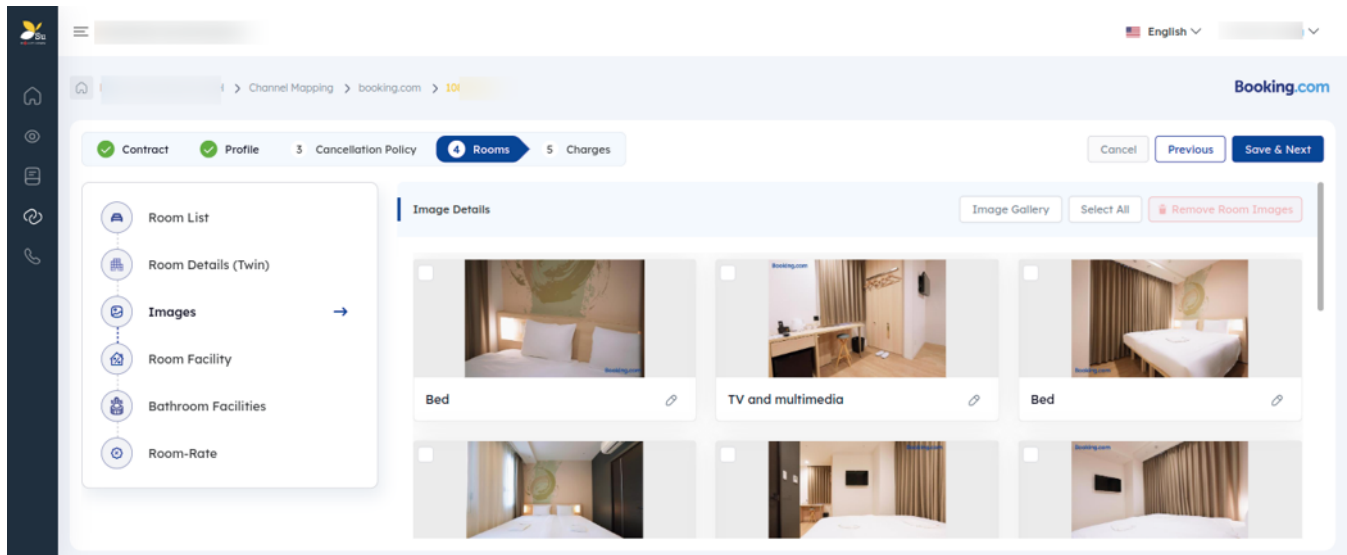

Filling in these fields is essential for the proper setup of the room.

The screenshot shows the 'Rooms' tab in the Booking.com management interface. The left sidebar contains a list of options: Room List, Room Details (Create Ro...), Images, Room Facility, Bathroom Facilities, and Room-Rate. The 'Room Details (Create Ro...)' option is highlighted with a red box. The main form displays the 'Room Detail' section for an 'Apartment'. The 'Listing Type' is 'Apartment', 'Listing Name' is 'Apartment', and 'Reference Name' is empty. The 'Number Of Listing' is 2, 'Size' is empty, and 'Unit' is 'Square Meter'. The 'Smoking Policy' is 'Non-smoking'. The 'Room Configuration' section shows 'Bedroom' and buttons for 'Add Bedroom' and 'Add Living Room'.

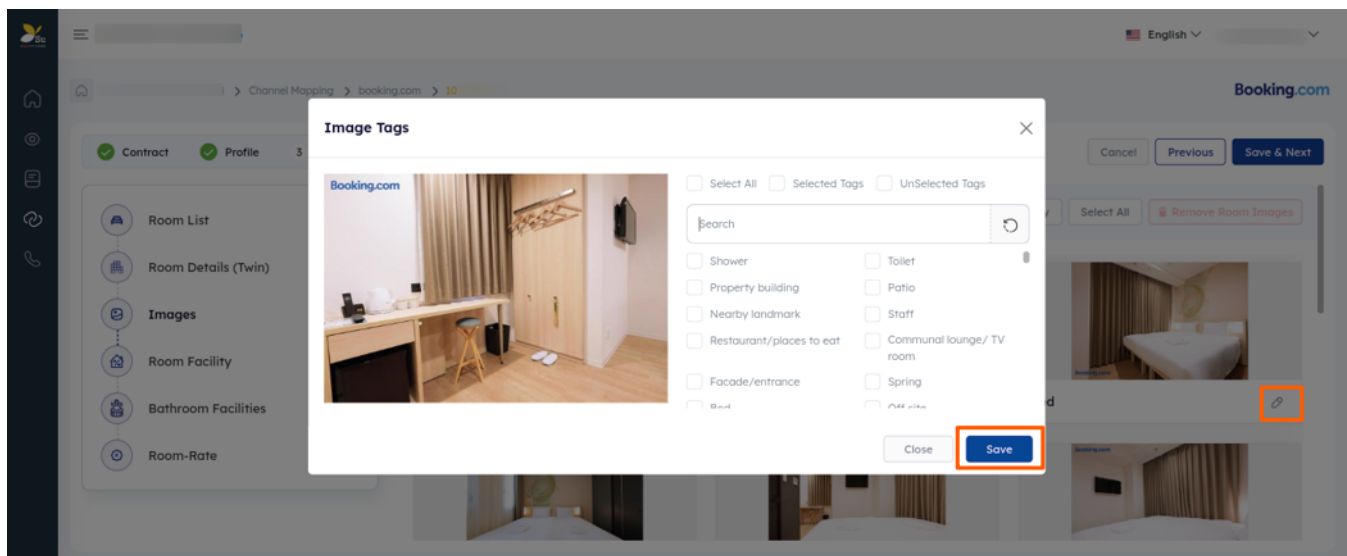

Save & Next: Go to Images.

2. Images:

Upload one or more photos for the room, and add or update photo tags to describe the content of those photos. Whenever a new photo is uploaded, by default, the API places the photo in the room-level photo gallery.

For updating the photo tags, Kindly click on the Pen Icon placed on the image.

Save & Next: Go to Room Facilities.

3. Room Facilities:

To manage the amenities and room facility information, these can be updated through the Content API on the Rooms > Rooms Facility page. The amenities are system default, We can select the respective one.

The screenshot shows the Booking.com management interface. The top navigation bar includes a logo, a language dropdown set to 'English', and a breadcrumb trail: 'Channel Mapping > booking.com > 10809910'. Below this is a progress bar with five steps: 'Contract' (checked), 'Profile' (checked), 'Cancellation Policy' (3), 'Rooms' (4, highlighted with a red box), and 'Charges' (5). To the right of the progress bar are buttons for 'Cancel', 'Previous', and 'Save & Next'. On the left, a sidebar contains icons for 'Room List', 'Room Details (Twin)', 'Images', 'Room Facility' (highlighted with a red box and an arrow), 'Bathroom Facilities', and 'Room-Rate'. The main content area is titled 'Amenities' and features a search bar and a grid of amenity checkboxes. The following table lists the amenities and their current selection status:

Amenity	Selected
Coffeetea maker	Yes
Internet facilities	No
Minibar	No
Shower	Yes
Bath	No
Safe deposit box	No
Payperview channels	No
Tv	Yes
Telephone	No
Fax	No
Airconditioning	Yes
Hair dryer	Yes
Wake up service/alarmclock	No
Hot tub	No
Clothing iron	No
Kitchenette	No
Balcony	No
Trouser press	No

There is no option to add, edit, or remove existing amenities. If an amenity is not required, please ensure it remains unselected.

Save & Next: Go to Bathroom Facility

4. Bathroom Facility:

Kindly configure the facility/amenity of the bathroom.

The screenshot shows the 'Bathroom Facilities' configuration screen in the Booking.com management interface. The top navigation bar and breadcrumb trail are identical to the previous screenshot. The progress bar shows 'Rooms' (4) as the current step and 'Charges' (5) as the next step. The sidebar on the left has 'Bathroom Facilities' highlighted with a red box and an arrow. The main content area is titled 'Bathroom Facilities' and contains the following configuration options:

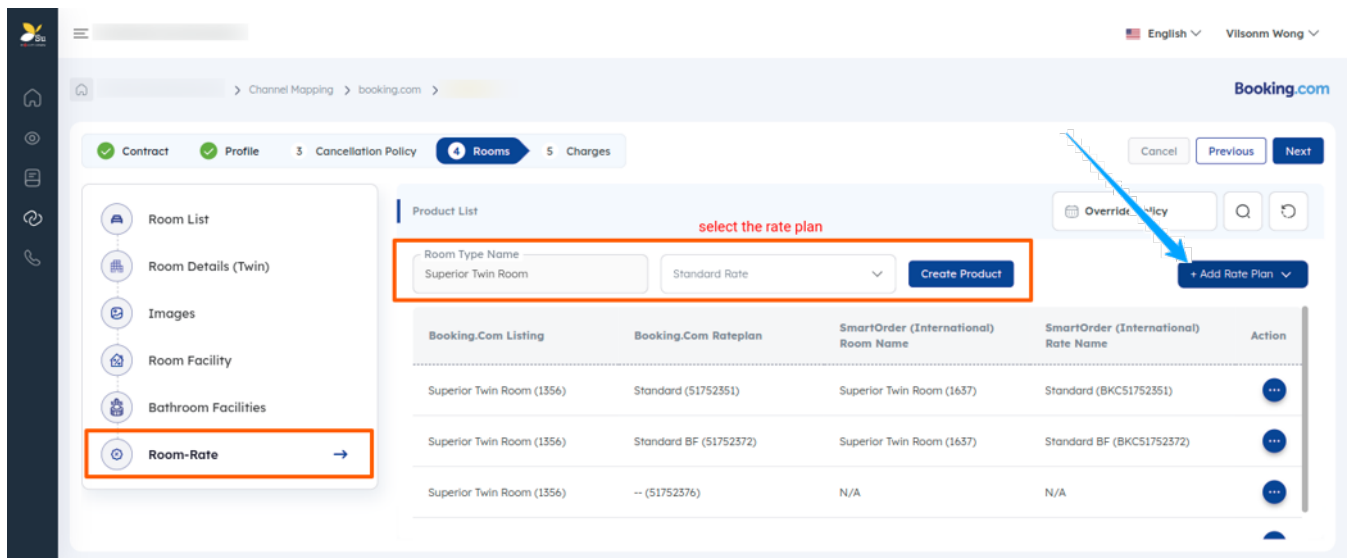

- Total Number Of Bathroom***: A text input field.
- Shared Bathroom**: An unchecked checkbox.
- Private Bathroom**: A checked checkbox.
- Private Bathroom Type***: A dropdown menu currently showing 'Standard Bathroom'.
- Private Bathroom Location***: A dropdown menu.

Save & Next: Go to Room-Rate.

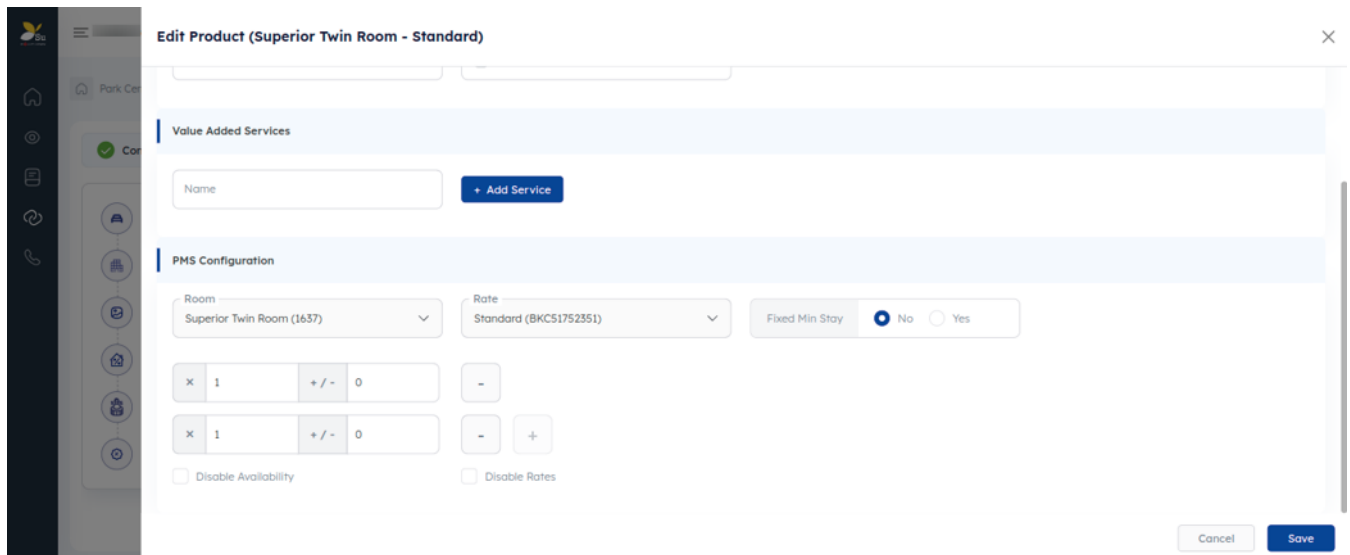

5. Room Rate:

After configuring the room, it's necessary to set the room rates. Using the **Room-Rate** feature, you can:

- Create a product (a combination of room type and rate plan)
- Create a new rate plan and associate it with the room
- Set the tariffs for the newly created product

For creating the product, please select the room type and rate plan > Click on Create Product. the below screen will come up.

Kindly set the rules and tariffs for the created product and Save the changes.

Save: the product will be created and will appear in the list as below.

If for creating a new product if new rate plan is required, then kindly please click on the " +Add Rate Plan ". There would 2 options that will come up,

- Manageable:** a "manageable" rate plan refers to a rate plan that a property owner can directly control and modify through the Extranet. It is a Standard or Master rate plan for which the rate, availability and restriction can be managed not only on the Booking.com extranet but also through the channel manager software.
- Non-Manageable:** a "non-manageable" rate plan is one that is automatically generated by Booking.com and cannot be edited by the property owner, typically including things like special deals or promotions offered by the platform itself. It is a derived/child rate plan linked with the master/standard rate plan. It is always managed from the master rate plan according to the rule and derivation set.
